NAAC Accredited
Teacher Training College

SRI DEBASHIS CHAKRABORTY
Chairman

Remedial Learning Engagement

Introduction—

Everyone in the classroom strives to study at the same pace as the others but this is typically not the case. Remedial Learning engagement is used with students who are falling behind in class. This method exists to encourage and help the learner, preventing them from falling behind and from developing a 'failure' mindset. Remedial education and classes are essential in closing the gap in their knowledge and achieving academic achievement.

Procedure—

1. Students who face difficulty in grasping topics in a classroom are given different educational strategies like refined practice, repetition of content and clarification.
2. Whereas in some case, individual attention is provided so that the topic is easily picked up by the student
3. Remedial educators use the necessary instructional techniques to help students overcome any learning obstacles and achieve their full potential.
4. Educator can assist the students by teaching the fundamental of reading, written language, mathematics and study organizational skills using innovative practices.

Objectives—

1. To support students who are performing poorly in comparison to their peers.
2. A teacher provides learning activities and practical experiences to students depending on their skills and requirements using the curriculum and teaching techniques used in the school.
3. To develop positive attitude and values, establishes the foundation for lifelong learning.

Outcome—

Remedial instruction begins by identifying the students' learning obstacles. Following the identification of these problems, the instructor must implement remedial instruction while keeping these problems in mind.
